

Regular Dental Visits

To keep your teeth and mouth healthy, you should visit the dentist for regular dental visits every 6 months.

Regular dental visits are important because they help keep your teeth and gums healthy. At your visit, the dentist will look at your teeth, gums, tongue, throat, head and neck. Your teeth will also be cleaned at your visit.

How do I keep my mouth healthy?

Oral health is important to keep your whole body healthy. To have good oral health you should brush your teeth at least twice a day. You should use a toothpaste that has fluoride in it. You should floss your teeth one time per day. You should use a mouth rinse to help get rid of plaque and bacteria. The mouth rinse will also freshen your breath.
